“Bernie was my rail mentor, a gentleman and a dear friend for 27 years, and I am crushed at his passing and very sorry for his family's loss.

*Bernie introduced me to the Dover Harbor, the world of private cars, and full-size railroad maintenance and operations. He gave selflessly, and took the time to teach me much of what I know in this domain. One of the most important things he taught me was how to look at a project, see it phases looking ahead, and work through it one step at a time - it is an invaluable skill. As a machinist he was incredible.*

*Bernie was kind, gentle, and had a wonderful, often dry, sense of humor. He had a way about him that made you want to be around him, made you want to learn, and made you want to be a better person. I could listen to him tell stories for hours. He used to hold court every Saturday during lunch at Dover Park and we would, as he put it, "talk over the world situation." We used to go to a lot of meetings together too, and I would pick him up in the car and do just that.*

*We had some amazing rail trips together, including a 2.5 hour ride from Manassas to Red Hill, Virginia in the cab of N&W No. 611, a steam locomotive in May 1994. He was stoic but there a smile on his face that said he was in his element. Another great trip was to Florida in Dover Harbor for a CSX charter in 1997. I also let him drive my 2005 Ford Mustang, and he really seemed to enjoy it too.*

*Bernie, you may be gone from our presence, but your spirit will always be with us and aboard Dover Harbor.*
