“ *My dearest condolences to the family of Charles Hedenstad. I just found it out this year about his passing after knowing about the idea of obituaries.*

I also want to briefly introduce myself, that I was his mentee from Germany who attended the college in Chestertown, MD.

I remember him having been gladly a mentor to me; who is an easy going personality and had shown me on my first day of college spring break his retirement community and also his water lab project the community was doing. I have really enjoyed that. Unfortunately; my 2nd till the last year of my college career have been impossible for me to get with him together or even contact him as my studies had been a huge priority and during the fall semester I have been spending most of my breaks mostly with my best family friend on the other side of the bay bridge; who unfortunately passed away this year on the end of July.

Anyhow; I wanted to give my condolences to his family and closest friends as I wanted to let them know that I was also thinking about him and didn't forgot him completely.
