“ I cleaned Lorraines home. I spent a short 2 hours every other week cleaning for her. I did not know Lorraine very long but the time have had with her she was always very kind to me. The memories I will hold will be our conversations we had together and her words of wisdom she would give to me. Although I worked for Lorraine, she was also a friend. It always amazed me with her little dog Mike and the way he was so protective over her, especially if I was vacuuming around her and how she would just shake her head, that little dog was so lucky to have such a wonderful caring human that loved him so much and his love for her was even greater. I surely am gonna miss her.
